PROFESSIONAL SUMMARY

Highly motivated Flutter Developer and Software Engineer with over 2 years of focused experience in crafting high-performance, cross-platform mobile and Android TV applications using Flutter & Dart. Proven expertise in Clean Architecture, State Management (Bloc, Cubit, GetX), and seamless API Integration, including REST and real-time protocols like Socket.io. Skilled in developing multi-tenant applications using Flutter Flavors, integrating complex video streaming, and utilizing mapping technologies like OpenStreetMap. Possess a strong track record of delivering scalable, real-world solutions that directly address business needs and significantly enhance user experience across mobile and TV platforms.

TECHNICAL SKILLS:

Languages & Frameworks: Flutter (Dart), Java, C++

Architecture & Patterns : Clean Architecture, MVC, SOLID Principles, Design Patterns, Flutter Flavors

State Management: Bloc, Cubit, GetX

Backend & Databases: REST APIs, Socket.io, Firebase (Auth, Firestore, Messaging, Crashlytics), MySQL, SQLite, Hive, SharedPreferences

Advanced Integrations: Video Streaming, Audio/Video Players, OpenStreetMap (OSM), Google Maps API, Pusher, Android TV Development

Tools & Version Control: Git, GitHub/GitLab, Android Studio, Visual Studio Code, Docker, Google Play Console

Core Capabilities: Responsive UI Design, Secure Authentication, Performance Optimization, Team Collaboration, Unit Testing (Exposure)

PROFESSIONAL EXPERIENCE & PROJECTS:

MTS Company | Flutter Developer | Oct 2025 – Present

- Multi-Tenant Architecture: Engineered and maintained multiple application variants using Flutter Flavors (MTS and Alfateh), streamlining a single codebase to serve different client environments and branding requirements.
- TV & Media Streaming: Developed and optimized the MTS TV and Android TV applications, integrating robust video player and live streaming functionalities for a seamless media consumption experience.
- Location & Mapping Services: Upgraded existing GPS capabilities and successfully integrated OpenStreetMap (OSM) for accurate, real-time location tracking and map rendering.
- Deployment & Backend: Managed ongoing Firebase integrations for real-time data handling and analytics, and currently managing the application's pre-launch preparations for deployment to the Google Play Store.
- Technologies: Flutter, Android TV, Video Streaming, OpenStreetMap, Flutter Flavors, Firebase, GPS/Location Services.

[Event Halls Management System](#) | Flutter Developer | Jun 2025 – Aug 2025

- Automated the entire event hall reservation process across dual mobile applications (User/Provider), resulting in an estimated 30% increase in operational efficiency for hall providers.
- Implemented real-time chat functionality and advanced geolocation-based filtering using the Google Maps API, significantly improving user search and booking experience.
- Engineered a comprehensive booking system that included modification, cancellation, and offer management, achieving a 100% successful transaction rate during the pilot phase.
- Utilized the Bloc pattern for robust state management and Firebase for secure authentication and real-time notifications.
- *Technologies: Flutter, Bloc, Firebase, REST APIs, Flutter Maps, Pusher, Pagination, Clean Architecture.*

Medical Centre Automation | *Flutter Developer* | Mar 2023 – Aug 2023

- Developed a suite of patient and physician mobile applications that reduced administrative calls and manual scheduling tasks by over 40% through full automation of appointments and consultation reports.
- Designed and implemented a fast, responsive, multi-role UI/UX (for patients, doctors, reception, and management) to ensure a consistent and efficient experience across all user groups.
- Integrated secure video consultation features and adhered to strict healthcare data privacy standards to ensure 100% compliance with data protection protocols

Stupify E-commerce Application (Dimo) | *Flutter Developer* | Mar 2023 – Aug 2023

- Launched a feature-rich e-commerce application, where collaborative effort within a 4-member team (2 Flutter, 2 Laravel) accelerated the feature delivery timeline by 25%.
- Developed advanced search, filtering, product review, and multi-lingual (AR/EN) support, leading to higher user engagement and reduced bounce rates.
- Applied Clean Architecture with GetX and the MVC pattern, ensuring a high degree of code maintainability and future scalability.
- Successfully prepared and deployed the application to the Google Play Store, passing all comprehensive compatibility tests.
- *Technologies: Flutter, Getx, MVC Architecture, REST APIs*

Mobile Consultation Platform | University Project | Jan 2023 – Mar 2023

- Developed a consultation platform connecting users with experts (Medical, Psychological, Business), creating a functional service that was tested by over 50 internal users.
- Implemented a secure wallet-based payment system and real-time consultation scheduling functionality, streamlining the financial and booking processes.
- *Technologies: Flutter, GetX, MVC Architecture, Custom UI.*

EDUCATION:

Bachelor's Degree in Software Engineering and Information Systems *Faculty of Informatics Engineering, University of Damascus (Graduated: 2025)*

ACADEMIC & VOLUNTEER EXPERIENCE :

Software Engineering Project: Applied Scrum methodology using JIRA, created comprehensive SRS documentation with use case diagrams, and performed Function Point estimation.

Certifications: Advanced Flutter Concepts Training - Damascus University; [Software Processes and Agile Practices](#) - Coursera; [Introduction to Software Product Management](#).

Volunteer: [Technical Team Member - Damascus Collegiate Programming Contest \(DCPC\) \(2023\)](#); Technical Team Member - ITE Team (2023); [Volunteer - Syrian Collegiate Programming Contest \(SCPC\) \(2022\)](#).
